

How to Clean Strataglass

Supplies

- Dawn dish soap
- Lukewarm water
- IMAR Strataglass protective polish
- Soft cotton microfiber cloth
- Dry soft towel

Do Not

- Use any ammonia base products
- Touch the glass with sunscreen
- Use any wax-and-wash, cleaners, polish products, or any scratch remover products

May result in the Strataglass being permanently stained or damaged and will Void Warranty

Steps to clean the Strataglass

- Rinse the Strataglass down with clean fresh water
- Use a mixture of ¼ cup of dawn dish soap and 1 gallon of lukewarm water
- Apply to the Strataglass material and use a soft cotton microfiber cloth to scrub any impurities off of the glass
- Rinse thoroughly
- Once the glass is half way dry, apply sparingly; IMAR Strataglass protective polish, in small circular motions
- Allow the polish to dry, then remove with a dry soft cloth

Recommended to clean the Strataglass at least twice a month to maintain shiny and clear material for longer use.
